U.S. FOREIGN TRADE

GENERAL IMPORTS Cotton Manufactures

OCTOBER 1971

FT 130-71-116
December 1971

U.S. DEPARTMENT OF COMMERCE/Bureau of the Census

Country of Origin and Geneva Agreement Category

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the U.S. Armed Forces for their own use are excluded. Shipments into the United States from Puerto Rico and from U.S. possessions and shipments between these outlying areas are not reported as U.S. imports, but imports into Puerto Rico from foreign countries are considered to be U.S. imports and are included in this report. Merchandise shipped under customs custody through the United States in transit from one foreign country to another is not reported as imports. Effective with the statistics for July 1965, the data in this report exclude information on all imports valued \$250 or less. From January 1958-June 1965, the statistics excluded information on imports valued under \$100 reported on formal immediate consumption entries and information on imports reported on informal entries (items valued not more than \$250). Effective January 1962, warehouse entries valued under \$100 were also excluded. Articles not of cotton but classified for customs purposes as cotton articles by similitude to cotton under the provisions of the Tariff Act of 1930 (as amended) are also excluded.

The general imports data represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from customs custody immediately upon arrival plus merchandise entered into bonded storage warehouses immediately upon arrival. These data differ from statistics on an import for consumption basis which represent imports of merchandise entered into U.S. consumption channels, i.e., merchandise released from customs custody immediately upon arrival and merchandise withdrawn from bonded storage warehouses for release into domestic consumption channels.

It is the objective of the compiling procedures, insofar as practical, to include shipments in the general import statistics for the month of import, which, in general, is based on the date of filing of the immediate

consumption or warehouse entry.¹ However, because of processing problems, there has always been a carryover of a small percentage of items from the proper month to a subsequent month (usually the month immediately following).

SOURCE OF INFORMATION

The source of information on imports of merchandise is the import entry (various customs forms) which importers are required to file with customs officials. Statistical factors of country of origin, net quantity, value, and commodity classification are verified by customs officials on formal consumption and warehouse entries filed for transactions valued over \$250, which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

COMMODITY INFORMATION

Data on imports of cotton manufactures are presented in terms of the 64 commodity categories of cotton textiles enumerated in appendix B to the GATT statement of July 21, 1961, entitled "Arrangements Regarding International Trade in Cotton Textiles." Effective September 1963, imported merchandise is being reported under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA).

QUANTITY INFORMATION

The quantity reported in the statistics is in terms of the units of quantity set forth in appendix B (see above) for the cotton textile categories. In instances where the reported quantity for a TSUSA commodity

¹For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was produced or manufactured. Where

the country of origin is not known, the country of shipment is shown and footnoted in this report. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of TSUSA. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

Additional information regarding the coverage and presentation of the import statistics is presented in the General Explanation of Report FT 135, U.S. Imports, General and Consumption, Schedule A Commodity and Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the Current Guide to Foreign Trade Statistics.

Country of Origin By Geneva Agreement Category
